## EXPERIENCE

**DevGate** 10/11/2025 – Present
*Full Stack Developer* Islamabad, Pakistan

- **Pricing Hub (The Children's Place) | Retail Promotional Pricing Platform:**
  - Migrated the Next.js application from JavaScript to strict TypeScript and moved the data layer to Prisma with PostgreSQL, with modular, typed API routes.
  - Built the MPP hand-off pipeline, turning published promotions into a CSV upload file and an Excel cancel list, with date ranges, dollar-off promotions and leading-zero-safe IDs.
  - Engineered multi-pivot pricing and the hierarchy cascade (Division → Style-Color) on AG Grid, including pivot override rules, offer extension and Hardmark uploads for future product moves.
  - Integrated Promo Intel suggested promotions with retail price guards and role-based publishing, and wrote Playwright end-to-end tests and the in-app user manual.
- **WEP (SMEDA) | Government Platform for Women Empowerment:**
  - Implemented a real-time chat module supporting interactive emoji reactions and nested message replies.
  - Engineered an asynchronous cron job utility to compile and deliver automated weekly updates on community post engagement (likes and comments).
  - Architected complete platform localization in Urdu using i18n libraries alongside 100% mobile-responsive layouts.
  - Streamlined platform security by integrating Google reCAPTCHA and led a comprehensive frontend redesign of the primary landing page.
- **Daftarpro | Office Operations Management:**
  - Developed and optimized core operational modules, including HR, accounting, and employee data management.
  - Engineered a secure Document Management System, integrating Cloudinary for asset storage and database-linked file retrieval.
  - Designed and implemented an Asset Tracking System to monitor hardware assignments and inventory lifecycle.
  - Built a dynamic Hiring Module featuring automated interview scheduling, real-time candidate notifications, and role-based access control.
- **ADHA (Abu Dhabi Housing Authority) | Data Analytics Portal:**
  - Architected a high-performance data dashboard for complex visualizations using Recharts (Donut and Line charts).
  - Streamlined data pipeline performance by integrating Databricks with IndexedDB, enabling near-instantaneous frontend data retrieval for large datasets.

**ERP Management System for Country Club** 10/03/2024 – 19/06/2025
*Full Stack Developer* Islamabad, Pakistan

- Developed a centralized web-based ERP application tailored for country club operations, streamlining administrative and managerial tasks.
- Implemented secure, role-specific dashboards and modules (Role-Based Access Control) for staff including HR, finance, operations, and inventory.
- Designed feature-specific modular architectures including Membership Management, Restaurant Management, Sports Management, and Rooms Management.
- Integrated ASP.NET Identity with JWT tokens for robust user management and secure authentication flows.
- Generated real-time reports and visual analytics dashboards for tracking financials, member engagement, and operational efficiency.

## SKILLS

**Languages & Frameworks** : JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, ASP.NET Core, Python, C#, HTML/CSS
**Databases & Cloud** : PostgreSQL, Prisma, SQL Server (EF Core), MongoDB, Databricks, IndexedDB, Cloudinary
**Tools & Technologies** : Git, GitHub, AG Grid, TanStack Query, Zustand, Playwright, Zod, Socket.io, JWT, i18n, Recharts, reCAPTCHA, Figma, Sanity CMS, Jira

## EDUCATION

**National University of Modern Languages (NUML)** 2021 – 2025
*Bachelor of Science in Computer Science (BSCS) – CGPA: 3.5/4.0* Islamabad, Pakistan
